GTXRaster CAD[®]

- Drawing Management
- PDF Support
- Image Cleanup
- Automatic Image Cleanup
- Raster Editing
- Hybrid Editing

If you use scanned paper drawings, either black and white or color, and BricsCAD V25 in your current engineering workflow, then the GTXRaster CAD [®] 2025 Series is a unique, cost-effective solution for bringing legacy drawings into your design environment. All commands, menus, and toolbars are consistent with the new BricsCAD V25, providing a productive and very easy-to-learn user interface, including the NEW customized GTX ribbon.

GTXRaster CAD Series is integrated with BricsCAD's Image Support Module (ISM), all commands, menus and toolbars are consistent with BricsCAD V25, providing a productive and very easy-to-learn user interface includes new, intuitive (making them easy to remember) menu and toolbar icons.

- Windows[®] 11, 10 and Windows[®] 8/8.1 64 bit Compatible Only.
- Fully BricsCAD Pro V25 Compatible.
- PDF Support for your scanned images, with this new feature you can open your PDF image, and edit it within BricsCAD, and save it as a Tiff or back to a PDF.
- Automatic Raster to Vector conversion for all your scanned images, including Geometry recognition and text recognition.
- Automatic and semi-automatic image cleanup, despeckle and deskew your image using the intuitive GTX Noise removal commands.
- Improved licensing, now includes Package and Borrow license options.
- Full Raster Editing, edit your scanned images using the powerful GTX raster manipulation commands.

Image Cleanup

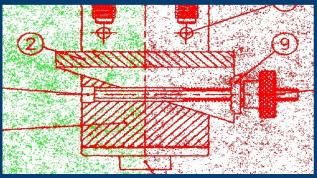

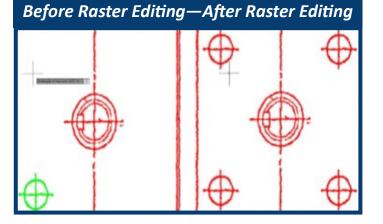

IMAGE CLEANUP

Quickly clean the scanned raster image using automatic image cleanup tools, or manually deskew, despeckle, and crop. You can also erase any part of the image, with raster erase and raster outline. Then draw BricsCAD vectors over the top of the image. *Picture to the left shows the selection of raster to be removed highlighted in green.*

INTELLIGENT OBJECT PICKING™

GTX's Intelligent Object Picking (IOP) technology allows you to work with raster entities as intelligent objects. Use this feature to select raster entities (line, arc, circle) even if touching other data. Use the AllText IOP to select all raster text entities. IOP preserves underlying geometry during erase and raster to vector conversion.

EFFICIENT RASTER EDITING

Raster editing features include both efficient cleanup and image restoration capability with powerful raster manipulation commands, allowing you to edit and save the raster data. Raster data can also be traced using BricsCAD design tools and stored or plotted as hybrid files. Or, convert vector entities into raster.

PDF Support

You can now load a black and white or color scanned PDF into GTXRaster CAD Series 2025 buy using the NEW gPDFATTACH command. This gives you the ability to convert your PDF scans into Tiff and you can also save from Tiff to PDF. By using the NEW gPDFSAVE command.

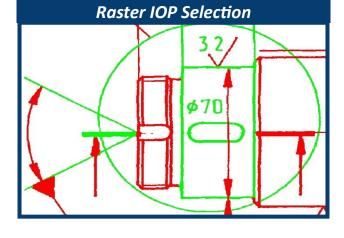

gPDFATTACH Command Icon.

GTX®ICR™ TEXT RECOGNITION

GTX ICR provides true Intelligent Character Recognition (ICR), based on hybrid neural-net technology. Train the software to automatically recognize text characters associated with individual or company drafting styles.

AUTOMATIC RASTER-TO-VECTOR CONVERSION

Quickly convert any or all selected raster into rectified and accurate BricsCAD entities. Convert selected raster objects into intelligent BricsCAD entities such as lines, arcs, circles, polylines, and true BricsCAD text. Its ability to recognize line styles, splines, cross-hatching, arrowheads, and also the ability to set a gap jump variable, further increase conversion accuracy.

ICR Character/Word Recognition

IMPORT & EXPORT

The New gIMPORT & gEXPORT commands will allow users to import and export .CAL and .CG4 formats directly into and out of BricsCAD.

KEY FEATURES

• Fully Compatible and Optimized to run in the BricsCAD V25 environment

DRAWING MANAGEMENT

- Enhanced PDF image support, Import PDF files, Save PDF to Tiff and Tiff to PDF
- Multiple Drawing Environment
- Cut raster image to file or buffer
- Insert a raster image or symbol into the current drawing
- Quick save of vector objects into the current drawing
- Convert vector objects to raster data for saving
- Create a new raster image

IMAGE CLEANUP

- Interactive despeckle
- Image cropping
- Manual Despeckle and Noise Removal
- Correct distortion on warped images
- Move, copy, scale, mirror and rotate images
 Draw lines or erase raster
- Draw inles of
- Smoothing

AUTOMATIC IMAGE CLEANUP

- AutoDeskew
- AutoClean
- Auto Deskew and Noise Removal RASTER EDITING
- Enhanced Multiple Copy command for raster objects
- Enhanced Raster Text Commands: Type and Edit Raster Text Enhanced Hybrid Text Editor
- Enhanced IOP Commands, IOP Rotated Window, Rotated Inside Window & Rotated Crossing Window
- Raster Editing Commands
- Change Raster Line, Arc & Circle
- Raster Slice Command
- 22 raster selection methods (IOP), Including 7 raster snap modes ensure precise editing
- Preserve intersections on edits
- Pick touching text
- Edge rasterization
- Raster symbols
- Turn, Move, Copy, Scale, Rotate, Array and Mirror selected raster data
- Cut-Paste between drawings
- Change or stretch raster objects
- Convert raster entities into vector entities
- Convert vector entities into raster data
 Raster drafting commands text, lines, arcs,
- circles, rectangles • True Type Font rasterization
- HYBRID EDITING

• Enhanced Hybrid Drawing Mode: Allows simultaneous creation of both vector and raster entities, including text.

- Drawing registration
- Migrate Raster Design /CAD Overlay[®] legacy data
 Full hybrid snap

- Import viewer redlines

GEOMETRY RECOGNITION

- Selective or full conversion
- Dashed arc recognition
- True arc/circle recognition
- Boundary/Edge tracing
- Intersection cleanup
- Ortho and angle snap
- Contour/Polyline recognition
- "Z" value (elevation) option
- Polyline smoothing
- Edge recognition and snap
- Dashed line alignment
- Cross-hatch recognition and separation
- Line, arc, circle & arrowhead recognition

TEXT RECOGNITION

- Character recognition
- Word recognition
- Size independent
- Font independent
- Orientation independent
- Combinations of training files
- Neural network engine
- Trainable character sets
- Trainable font recognition
- Training file editing
- Open Format / Plain Text dictionary
- Pattern matching

VECTOR CLEANUP

- Post vectorizing cleanup tools
- Line deskewing
- Line relimiting
- Line joining
- Circle concentric function
- Circle alike function
- Layer control

ADDITIONAL PRODUCT FEATURES

- New Borrow License option for Network FlexLM licensing
- Automatic snap to raster or vector entities using AutoSnap[™]
- Seamless hybrid plotting
- Floating Network License Option
- Support for raster in paper space
- Multiple raster/vector undos
- Integrated "Save" commands
